

### Computer Fundamentals (MCQ's)

#### 1. The basic architecture of computer was developed by

- A. John Von Neumann
- B. Charles Babbage
- C. Blaise Pascal
- D. Garden Moore
- E. None of these

**Answer: Option A** 

**Solution:** 

In 1945, Professor J. von Neumann, who was then working at the Moore School of Engineering in Philadelphia, where the E.N.I.A.C. had been built, issued on behalf of a group of his co-workers, a report on the logical design of digital computers.

#### 2. Which of the following memory is non-volatile?

- A. SRAM
- B. DRAM
- C. ROM
- D. All of the above
- E. None of these

**Answer: Option C** 

**Solution:** 

ROM is non-volatile memory.

#### 3. GUI stands for

- A. Graph Use Interface
- B. Graphical Universal Interface
- C. Graphical User Interface
- D. Graphical Unique Interface

## **Tutorial on Computer Fundamentals**

E. None of these

**Answer: Option C** 

#### **Solution:**

A Graphical User Interface is a computer interface that allows users to interact with a device through graphical elements such as pictures and animations, as opposed to text-based commands.

#### 4. Any data or instruction entered into the memory of a computer is considered as

- A. Storage
- B. Output
- C. Input
- D. Information
- E. None of these

**Answer: Option C** 

No explanation is given for this question

#### 5. Time during which a job is processed by the computer is:

- A. Execution Time
- B. Delay Time
- C. Real Time
- D. Waiting Time
- E. None of these

**Answer: Option A** 

**Solution:** 

Time during which a job is processed by the computer is **Execution Time**.

#### 6. Which one of the following is not an application software package?

A. Red Hat Linux

# **Tutorial on Computer Fundamentals**

- B. Microsoft Office
- C. Adobe Pagemaker
- D. Open Office
- E. None of these

**Answer: Option A** 

**Solution:** 

Red Hat Linux is one of the highly used Enterprise Operating System in the Linux Market.

#### 7. Which of the following statement is wrong?

- A. Photoshop is a graphical design tool by Adobe
- B. Linux is free and open source software
- C. Linux is owned and sold by Microsoft
- D. Windows XP is an operating system
- E. None of the above

**Answer: Option C** 

**Solution:** 

Linux is free and open source software it is not sold by Microsoft or any other company.

#### 8. Microsoft Word is an example of

- A. an operating system
- B. Processing device
- C. Application software
- D. an input device
- E. System Software

**Answer: Option C** 

## **Tutorial on Computer Fundamentals**

#### **Solution:**

Microsoft Word or MS-WORD (often called Word) is a graphical word processing program that users can type with. It is made by the computer company Microsoft.

#### 9. Who invented the supercomputer?

- A. Charles Babbage
- B. JH Van Tassell
- C. Charles Ginsberg
- D. Seymour Cray
- E. None of these

**Answer: Option D** 

**Solution:** 

Supercomputers were introduced in the 1960s, and for several decades the fastest were made by **Seymour Cray** at Control Data Corporation (CDC)

#### 10. Graphical pictures that represent an object like file, folder etc are:

- A. Task bar
- **B. Windows**
- C. Icons
- D. Desktop
- E. None of these

**Answer: Option C** 

**Solution:** 

Graphical pictures that represent an object like file, folder etc are **Icons**.

#### 11. Which of the following operating systems is produced by IBM?

A. OS-2

## **Tutorial on Computer Fundamentals**

- B. Windows
- C. DOS
- D. UNIX

### **Answer: Option A**

**Solution:** 

This version was released on 25 September 1996. OS/2 is a series of computer operating systems, initially created by Microsoft and IBM under the leadership of IBM software designer Ed Iacobucci.

#### 12. The processor which performs arithmetical and logical operations is called

- A. Control
- B. ALU
- C. Register
- D. Cache Memory

#### **Answer: Option B**

**Solution:** 

An arithmetic logic unit (ALU) is a digital circuit used to perform arithmetic and logic operations.

#### 13. Which of the following was the first Intel processor introduced?

- A. 3080
- B. 4004
- C. 8080
- D. 8086

**Answer: Option B** 

**Solution:** 

# **Tutorial on Computer Fundamentals**

The Intel 4004 is a 4-bit central processing unit (CPU) released by Intel Corporation in 1971.

- A. 1963
- B. 1969
- C. 1971
- D. 1974

**Answer: Option C Solution:** 

Sent by computer engineer **Ray Tomlinson** in **1971**, the email was simply a test message to himself.

#### 15. Operating System is the most common type of \_\_\_\_\_ software.

- A. Communication
- B. Application
- C. System
- D. Word Processing Software

Answer: Option C Solution:

An operating system (OS) is system software that manages computer hardware and software resources and provides common services for computer programs.

#### 16. The operating system manages

- A. Memory
- B. Processor

# **Tutorial on Computer Fundamentals**

- C. Disk and I/O Devices
- D. All of the above

**Answer: Option D** 

#### 17. Computer Virus is a \_\_\_\_\_.

- A. Hardware
- B. Software
- C. Bacteria
- D. Freeware

# **Answer: Option B**

**Solution:** 

A computer virus is a malicious software program loaded onto a user's computer without the user's knowledge and performs malicious actions.

#### 18. The file extension of MS-Word document in Office 2007 is \_\_\_\_\_.

- A. .doc
- B. .docx
- C. .pdf
- D. .txt
- E. .xls

**Answer: Option B** 

**Solution:** 

Office Open XML (OOXML) format was introduced with Microsoft Office 2007 and became the default format of Microsoft Word ever since. Pertaining file extensions include: .docx – Word document.

#### 19. One MB is equal to?

A. 1024 Byte

B. 1024 KB

C. 1000 KB

D. 1024 GB

**Answer: Option B** 

# 20. Dot-matrix, Deskjet, Inkjet and Laser are all types of which computer peripherals?

- A. Printers
- B. Software
- C. Monitors
- D. Keyboards

### **Answer: Option A**

**Solution:** 

In computing, a printer is a peripheral device which makes a persistent human-readable representation of graphics or text on paper.

#### 21. Internet Explorer is a type of

- A. Operating System
- B. Browser
- C. IP address
- D. Compiler

# Answer: Option B

**Solution:** 

Internet Explorer (formerly Microsoft Internet Explorer and Windows Internet Explorer, commonly abbreviated IE or MSIE) is a series of graphical web browsers developed by Microsoft and included in the Microsoft Windows line of operating systems, starting in 1995.

# **Tutorial on Computer Fundamentals**

#### 22. \_\_\_\_ is the high speed memory used in the computer.

- A. RAM
- B. Hard Disk
- C. Cache
- D. BIOS

# **Answer: Option C Solution:**

Cache memory, also called CPU memory, is high-speed static random access memory (SRAM) that a computer microprocessor can access more quickly than it can access regular random access memory (RAM).

#### 23. Which one of the following is an example of Operating System?

- A. Microsoft Word
- B. Microsoft Excel
- C. Microsoft Access
- D. Microsoft Windows

**Answer: Option D** 

**Solution:** 

Microsoft Windows is a group of several graphical operating system families, all of which are developed, marketed, and sold by Microsoft.

#### 24. A collection of 8 bits is called

- A. Byte
- B. Record
- C. Word
- D. Nibble

**Answer: Option A** 

#### 25. A list of instructions used by a computer is called

- A. Text
- B. CPU
- C. Program
- D. Output

**Answer: Option C Solution:** 

A computer program is a sequence of instructions for performing a task designed to solve specific problems.

#### 26. The process of putting data into a storage location is called

- A. Reading
- B. Writing
- C. Controlling
- D. Hand Shaking

**Answer: Option B** 

### Different Programming Language, Compiler & Interpreter (MCQ's)

- 1. What is the only thing that computers understand?
  - a) Machine Code
  - b) Low Level Languages
  - c) High Level Languages
  - d) Algorithms

**Answer: Option A** 

- 2. A language that requires no knowledge of the hardware or the instruction set of the computer is called...
  - a) A High Level Language
  - b) A Low Level Language
  - c) Machine Code
  - d) An Algorithm

**Answer: Option A** 

- 3. A language that is close to human language and which is easy to write, debug and maintain is known as...
  - a) A High Level Language
  - b) A Low Level Language
  - c) An Algorithm
  - d) Machine Code

	4.	Resolving	errors in	a program i	is known as
--	----	-----------	-----------	-------------	-------------

- a) Debugging
- b) Refixing
- c) Error Checking
- d) Problem Solving

**Answer: Option A** 

#### 5. Which of the following is not a high level programming language?

- a) Assembly
- b) C++
- c) Java
- d) Python

**Answer: Option A** 

# 6. Languages that relate to the architecture and hardware of a specific computer are known as...

- a) High Level Languages
- b) Low Level Languages
- c) Simplex Languages
- d) Complex Languages

**Answer: Option B** 

7. What is the name for the software used	to convert an assembly language program
into machine code?	

- a) Assembler
- b) Interpreter
- c) Compiler
- d) Translator

**Answer: Option A** 

#### 8. The 3 main types of translators are...

- a) Assemblers, Compilers & Interpreters
- b) Assemblers, Compilers & Converters
- c) Assemblers, Scripters & Interpreters
- d) Converters, Scripters & Interpreters

**Answer: Option A** 

- 9. Which type of translator creates an executable file of machine code from a program written in a high level language?
  - a) Compiler
  - b) Assembler
  - c) Interpreter
  - d) Executor

**Answer: Option A** 

<b>10</b> .	Software that translates and	executes a high l	level language p	rogram one l	ine at a
tim	e is known as a?				

- a) Compiler
- b) Interpreter
- c) Assembler
- d) Executor

**Answer: Option B** 

- 11. An error in a program that prevents the program from running as expected.
  - a) Error report
  - b) Bug
  - c) Mistake
  - d) Algorithm

**Answer: Option B**
